VERSA SERIES

LINKAGE SPREADERS

Engineered for maximum payload and exceptional maneuverability, the Hansa Versa Series sets the standard for high-capacity 3-point linkage spreaders. Designed with a close-coupling frame to optimise weight distribution, its conveyor feed system handles everything from urea to heavy rates lime & compost without bridging.

VARIABLE RATE TECHNOLOGY

Seamlessly maximise input efficiency using the Hansa H5 variable rate controller. Set your desired application rate, bout width and spinner speed directly from the cab, allowing precise rate control without the guesswork.

BUILT FOR THE LONGHAUL

The one piece stainless steel body is integrated with its frame, eliminating the chance of corrosion and extending the overall life of the spreader unit.

WEIGHT DISTRIBUTION

The Hansa Versa Series features a unique connection that allows the spreader to sit much closer to the tractor aiding in weight distribution and essentially allowing larger payloads to be carried with less front weight on the tractor.
